

HD671

SILICONE MATERIAL CLOSED-BACK HEADPHONE

Simple, Light Weight, but Extraordinary

Description

This over-ear headphone with self-adjusting headband is equipped with a Ø50mm dynamic driver and closed-back structure.

HD671 is simple and fashionable in design and super lightweight with a great fit. The HD671 features a low impedance and extraordinary sound quality even when connecting directly to smart phones.

HD671 is the most light contact pressure closed-back headphone in the world. Equipped with soft silicone earpads, HD671 delivers optimal fit and comfort as well as superior isolation.

The advantage of the silicone earpads

- The high flexibility and softness of the silicone earpads provides best-fit for the ears
- The silicone earpads significantly reduce sound leakage for the best listening experience with more powerful bass (HD671)
- High durability compared to the normal earpads
- Extraordinary noise reduction for excellent ambient noise isolation (HD671)
- Washable pads for easy cleaning
- The soft pads enable very long-time wearing
- Non-toxic design

Features

- Dynamic closed-back headphone
- Ø50mm precise composite diaphragm
- Light weight design
- Studio monitoring grade, precise and balance sound
- Robust structure design
